Branding Your Ebook

The ClixSense as an Internet Business ebook comes with a brandable and non-brandable edition. Their filenames are:

- b_clixsense_business.pdf
- nb_clixsense_business.pdf

The first ebook is brandable and must be branded before use or distribution or some links would not work. The second ebook is ready for use and does not need to be branded. You can choose to use either ebook as the content is the same except for the brandable links.

The following links in the brandable ebook are brandable:

- The title and link following the text "Brought to you by:" on the front cover.
- The title and link at the bottom of every alternate page.
- The ClixSense referral URL at the first paragraph of Chapter 3.
- The ClickBank ID for the IDplr product under Section C.3 in Appendix C.

Now, if you are ready, let's begin the branding process.

Download

If you have not already done so, download the following file onto your hard disk:

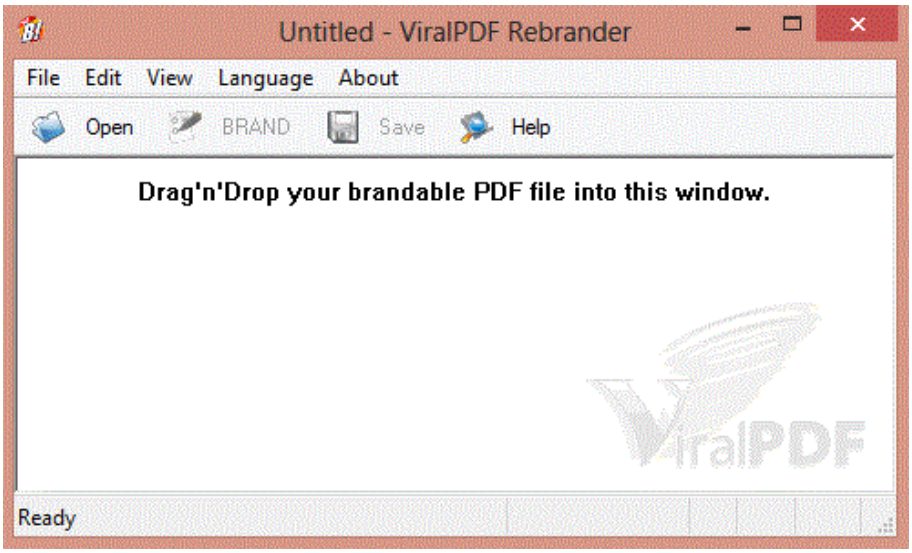
- b_clixsense_business.pdf
- brander.exe

All the files can be downloaded from here.

Run the Brander

The brander is an executable file that runs on Windows platforms and must be run to brand the ebook. If you would rather not run the brander, or are unable to do so, you can fill in the form here and I will brand your ebook for you.

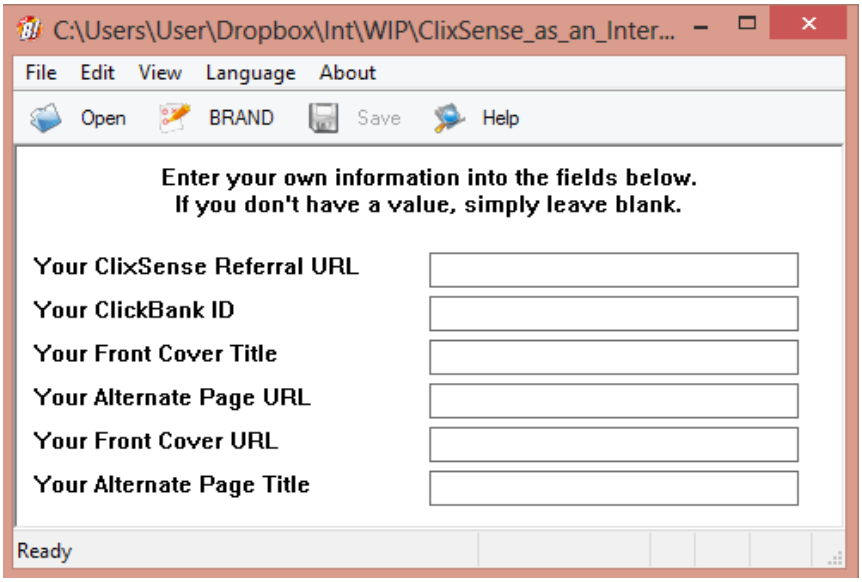
Navigate to where you have stored the brander, brander.exe, and run it. When you run the brander, a window similar to the one below will open:



Loading the Brandable Ebook

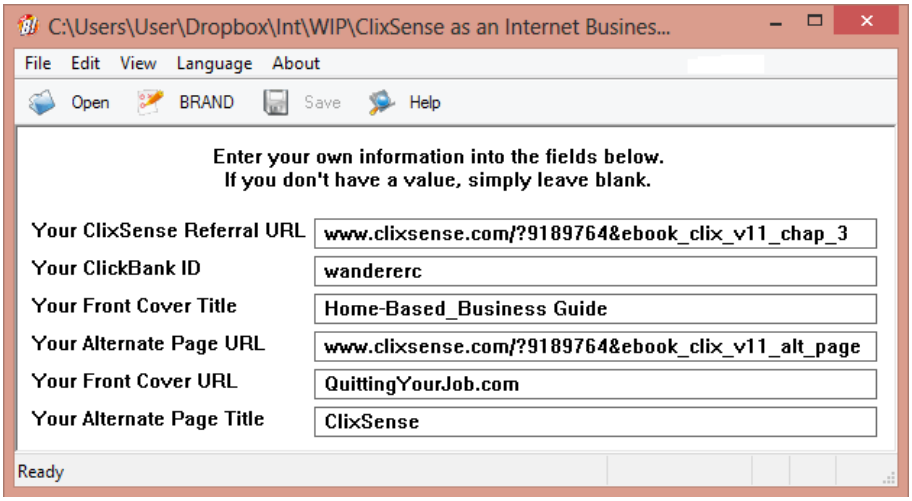
Open Windows Explorer, navigate to where you have stored the brandable ebook, b_clixsense_business.pdf, and drag and drop it into the brander's main window. Alternatively, you can also use the "File >> Open " command, and navigate to where the ebook is stored.

The brander will take a moment to process the ebook, after which you will see the screen below:



Branding the Ebook

Fill in the titles and sites for the front cover and alternative pages. You can also fill in your ClickBank ID and ClixSense referral URL if you have one. After you are done, the screen will look something like this:



Important:

URLs must be typed in without the "http://".

The information that you see entered are those used for the non-brandable edition, and are my own links. They are included to give you an idea of what is expected and you should include your own information when you run the brander. If you have nothing to enter, you may leave the field blank.

Once done, click on the "BRAND" button at the top. You will get a screen telling you to remember to save your file and the "SAVE" button on the brander will become clickable.

Click on the save button to save your branded ebook.

Testing

Open your newly branded ebook. Check that the title and site names are correct. Click on all the links to make sure that they are clickable and they go where you want them to go.

And you are done.

Licence

The branded ebook will have the same rights as the unbranded

ebook. If you want to brand multiple copies of the ebook with different links for each ebook, you may do so. There is no limit to the number of times you can brand the ebook.
